

Dear Parents

This year has certainly started well. Teachers were ready with a variety of activities classes, fun days, reading competitions and enjoyable field trips.

As our children are increasingly affected by an opened world around them, we thought of introducing a daily program that help them explore and develop different personal and social values.

Living Values is an educational program that offers a variety of experiential activities and practical methodologies to discover the positive qualities we have as Muslims and make them stronger.

We started by introducing the meanings of Respect and how to show respect to ourselves and the people around us. After, we discussed the value of Responsibility and how to identify ones' different responsibilities and learn tips for time management in order to succeed to accomplish all the responsibilities and obligations they have.

Finally, we would like to remind you that your role in supporting and guiding your child is the key to acquire the habit of loving to read.

School Principal

FOUNDATION

Foundation staff enjoyed welcoming the beloved F2 students and the lovely new members of F1 in an atmosphere of fun and love. Students are blooming while learning, growing and enjoying activities, trips & fun days.

BIG DAY OFF

CP1 to CP5

Young learners of CP 1,2,3 enjoyed a day off at school. They were busy going around different stations making galaxy dough, working on word searches, learning about healthy sleeping habits and playing lots of fun sports games.

They ended their day with a lovely dish party. Students' grade 4&5 spent a unique day at school with their teachers in which they simulated a day off following all their daily routines and activities, they had lots of fun.

readathon

CP1 to Gr.7

Reading Campaign outcomes were amazing this year. Our big challenge was not only to get the students to read but also to enjoy reading. The weekly competition and the desire of the students to win encouraged them to continue reading waiting for the Pizza Party, the Ice cream Party and the prizes.

1st Student Assembly

CP6 & Gr.7

Students of grades 6 & 7 have made us all inexplicably proud with their performances in the first student assembly. Their work included presentations and plays in English & Arabic, short films, poetry recitals and choir songs.

Living VALUES Programme

KIDS **ACTING** OUT

DRAMA CLASSES

CP1 to CP5

Drama classes were a golden chance for students to practice English in a different context. They read, acted and enjoyed their time. Their efforts were crowned with a final performance which was really breath taking.

Science

Students of grades 4&5 were encouraged to read science articles related to the topics they have learnt in class, to associate their knowledge to real life news.

Grade 6 students were asked to display the knowledge they have learnt in a collective project. This develops their critical thinking skills by collecting & comparing the information.

2D & 3D Shapes Project by Grade 4

Excellent effort by our rising STARS!

In this project, our students built some of the basic geometric shapes. They used Play-Dough and drinking straws to explore 2D and 3D polygons & quadrilaterals shapes!!

"Cities taking shape" Grade 5 projects

Creation and innovation have been raised from our super stars. Grade 5 students have been asked to design a futuristic city block, Which must include at least 3 buildings and at least two different shapes. They were asked to produce two drawings (front view & top view) and a 3D model of their city block.
